

1.0 PURPOSE

As Naturel Holding and its Affiliates, we fully comply with national and international legal requirements in all our activities; we constantly strive to reduce the environmental impacts caused by our suppliers and services through the use of continuous improvement tools and appropriate technologies.

With our understanding of sustainable environment and energy, we aim to hand over a clean and livable world to future generations.

2.0 SCOPE

This policy covers all supply chain activities of Naturel Holding and its Affiliates, by taking into consideration environmental factors.

3.0 PRINCIPLES AND PRACTICES

Naturel Holding and its Affiliates internalize the importance of conducting integrated assessments to determine environmental risks and impacts associated with the continuity of the supply chain, as well as its environmental and social performance. In this scope we commit;

- Contributing to the development of the supply chain for a sustainable environment for the benefit of our society and planet,
- We expect the companies in our supply network to have a similar ethical business approach and to achieve development and achievement in these areas as well as in training their own suppliers and auditing their practices,
- We aim to ensure that environmental, ethical, occupational health and safety, labor practices are a core component of all our purchasing practices, including supplier selection and relationship development,
- We aim to establish a strong and stable relations with our customers and suppliers based on trust and mutual benefit,
- We make maximum efforts to meet environmental rules in all areas where we operate and comply with good governance practices,
- We are mindful of our impact on natural environment,
- We research and support business partners who have our values and environmental commitments,
- We not only demonstrate environmental working conditions and environmental management in our own companies, but also require all our suppliers to comply with the standards set out in our Ethical Principles and Code of Conduct. We work towards our goals for continuous improvement by establishing systematic partnerships with our suppliers,
- In this context, we recommend our environmental approach to our suppliers and terminate our relationships with the suppliers who can't meet the Environmental Rules in the long term.

**SUPPLIER VIOLATION OF ENVIRONMENTAL
